Software Engineer – GAMMA

Dear Sir/ Madam,

I am writing to you this cover letter in reference to the job posting of Software Engineer position at your Company. I believe that I will be a genuine fit for this position as I am as a Software Engineer with more than 2 years of experience in a variety of Technologies.

I'm always excited to learn new Tech as well as mastering my existing skills by practice by building new projects. My skills range from HTML, CSS, Vanilla JS & React JS to build creative frontend, to Python (Flask) & Node JS to build sound backend.

Other than coding, I love reading books. My interest is in Philosophy, History, Culture, Satire, etc. I also love music, mostly vernacular classical music, something I occasionally play in my spare time.

I candidly believe that I'll make a reliable all-round addition to your Team.

Thanks for your time. Always happy to hear from you.

Sincerely,

Dipto Biswas
